

Prescription OCR Interpretation Report

Compiled interpretations of 9 handwritten prescription images (test_image_1 – test_image_9)

Important: These are best-effort OCR interpretations of handwritten prescriptions with significant illegibility. Several dosages and drug names are guesses and are explicitly flagged as uncertain below. This document is not a valid prescription and must not be used to administer or dispense medication. Please consult the original prescriber or a licensed pharmacist/physician to confirm every entry before any medication is taken.

test_image_1.jpeg

Interpretation: Likely a cardiovascular (hypertension / ischemic heart disease) maintenance regimen.

SI No.	Interpreted Drug	Strength	Frequency	Raw OCR Text
1	Aspirin	75 mg	Usually OD (once daily)	Aspirin 75mg
2	Atorvastatin	Not specified, guessed 40mg	OD	Atoniuntatlon
3	Losartan	Not specified, guessed 50mg	OD	Los cutrom
4	Amlodipine	Not specified	OD	Amlodipin
5	Bisoprolol	2.5 mg	OD / BD?	Disoprolol 2.5mg

test_image_2.jpeg

Interpretation: Extremely garbled and illegible. Contains a doctor's name and registration number. This needs a complete rewrite by the prescriber.

Category	Details
Raw OCR Text	1) metal Pan bda 50g → 13D Hg → 13D 3) tcrlurt - nr 10g tdb → 13D mch - nr → 10g
Best Guess / Notes	Possibly mentions "Iron" (ferrous sulfate) and "Hb" (Hemoglobin) levels, but dosages (50g, 10g) are impossibly high. Likely a pediatric or nutritional chart. Do not take this as a valid prescription.

Prescriber: Dr. Indrani Indarani, MBBS (Peradeniya), SLNC No: 10822

test_image_3.jpeg

Interpretation: A mixed prescription for neurology (migraine/vertigo), pain, and gastroenterology.

SI No.	Interpreted Drug	Strength	Frequency / Duration	Raw OCR Text
1	Flunarizine	10 mg	At 7 PM, for 1 month (×1/12)	Flunarizin. 10 mg (7pm) ×1/12
2	Diclofenac (Rapidene)	50 mg?	SOS (as needed for pain)	Rapidene 30° SOS
3	Domperidone	10 mg	SOS (as needed for nausea)	domperidone 10 mg SOS
4	Etoricoxib (Zentacox)	90 mg	Morning (m), for 1 week, then SOS	Zentacox 90 mg m ×1/52 → SOS 20°
5	Pantoprazole (Pancum)	40 mg	Possibly OD, for 1 month	Pancum 40 mg 6d ×1/12

test_image_4.jpeg

Interpretation: A classic Acute Coronary Syndrome (ACS) / Post-PCI (angioplasty) treatment plan. Contains injectable blood thinners and dual antiplatelet therapy.

SI No.	Interpreted Drug	Strength	Frequency / Duration	Raw OCR Text
1	Enoxaparin (Injection)	60 mg	Subcutaneous (S/C), BD ×48 hrs	S/C Enoxaparin 60 mg bd x 48 hrs
2	Aspirin	75 mg	OD	Aspirin 75 mg
3	Clopidogrel	75 mg	OD	Clopidogrel 75 mg
4	Atorvastatin	40 mg	OD – Night	Atomastatin 40 mg
5	Bisoprolol	2.5 mg	BD	Bisoprolol 2.5 mg bd
6	[?] Pcl 0.3	40 mg	Morning (m)	Pcl 0.3 40 mg (m)
7	Aldactone (Spironolactone)	25 mg	Morning (m)	Aldactone 25 mg (m)
8	[?] Ran CV	500 mg	BD	Ran CV 500mg bd
9	Nicorandil (Nitroprandil)	10 mg	BD	Nitroprandil 10 mg bd
10	Pantoprazole	40 mg	BD	Pantoprazole 40 mg bd
11	GTN (Glyceryl Trinitrate)	1 tablet	Sublingual, 3×/as needed	GTN 1 tab 3 o.s

test_image_5.jpeg

Interpretation: Very poor OCR. Likely a gastro-enterology or endocrine prescription, but requires clarification.

Category	Details
Raw OCR Text	Rapoma (long) bed / Deflation 0.5 mg / bed / Pegone La 10d / Preglon 8 song / bultiy - S/■
Best Guess / Notes	"Rapoma" likely refers to Rabeprazole (gastric acid reducer). "Deflation" might refer to Deflazacort (corticosteroid) but 0.5mg is too low. "Pegone La" and "Preglon" are unidentifiable. Strongly advise clarification.

Prescriber: Dr. N. Prasad Jayasinghe

test_image_6.jpeg

Interpretation: Highly garbled text. Looks like a standard 3-item prescription.

SI No.	Raw OCR Text	Best Guess / Notes
1	Tab. Ar hirdeau, 1007.	Possibly "Tab. A... 100mg" (e.g., Aspirin 100mg or Atenolol 100mg).
2	Job. Pantodae- 409.	Likely "Tab. Pantoprazole 40mg".
3	Cop. Nermigan 1 dail.	Likely "Cap. ... 1 daily".
—	Rest (1 bd. / 6 / 5 / bq / Nop / fr)	Gibberish / irrelevant fragments. Needs clarification.

test_image_7.jpeg

Interpretation: Likely a Diabetic (Type 2) + Hypertension prescription.

SI No.	Interpreted Drug	Strength	Frequency	Raw OCR Text
1	Atorvastatin	20 mg	OD – Night	Atogen 20 x ue (likely "Atorva" + "nocte")
2	[?] Securet	19 x 60	Unknown	Securet 19 x 60
3	Gliclazide	80 mg	BD / OD	Struglice 80 x 60 (Sulfonylurea for diabetes)
4	[?] Stratigraphy / Metformin?	50 x 60	BD	Stratigraphy 50 x 60 (Possibly Metformin 500mg misread)
5	Insulin Mixtard (30/70)	100 IU/ml	BD	w. fusulin 100 x 100 30/70
Vitals	Blood Pressure (OPT)	—	—	OPT – 120/60 (Observed BP reading)

test_image_8.jpeg

Interpretation: Clearly a Psychiatric/Psychology prescription (anti-depressants, anti-psychotics, anxiolytics).

SI No.	Interpreted Drug	Strength	Frequency	Raw OCR Text
1	Fluoxetine	20 mg	BD	fluoxetine 20mg BD
2	Clomipramine	100 mg	Probably OD at night ("ml" is a typo)	clomipramine 100mg ml
3	Mirtazapine (Miracap)	15 mg	Probably OD at night	miracap 15mg ml
4	Risperidone (Rispon)	20 mg	BD (high dose, verify)	Rispon 20mg BD
5	Clonazepam (Aston)	1 mg?	BD	Aston 1BD

test_image_9.jpeg

Interpretation: A Dermatological (Skin) treatment regimen.

SI No.	Interpreted Drug	Form	Frequency / Duration	Raw OCR Text
1	Acyclovir (Herpeveco)	Cream	Local Application (LA), BD	Herpeveco cream LA bol
2	Emollient (Emolins)	Cream	Local Application (LA), TID	Emolins cream LA tidi.
3	[?] Antifungal / Antibiotic	Powder	5 times/day for 5 days	Aydunf peums 5 times/day x 5d.
